## APP DESIGN

The Gratitude Journal is an app that I conceptualized and designed the UI for.

## PHOTOGRAPHY MONTAGE

In this project, I used a number of my own personal photographs to create a montage inspired by the freedom that literature allows the reader's imagination.

## PHOTOGRAPHY NARRATIVE

This photography project is called 'Side Effects.'  
Each image represents my personal side effects of the global  
pandemic that hit the world in 2020.

## PRINTS AND STICKERS

I designed these prints and stickers as a personal project.

## Our Flavors

Each flavor we sell is locally sourced near all your favorite National Parks

All the ingredients are organic and aim to take you on a journey through the mountains and forests you have come to love

## For Best Taste

Boil 8 oz of water  
Pour freshly boiled water over your tea bag

Let it steep for 3 minutes  
Enjoy!

## Our Goal

With each box of tea you buy, we hope to take you on an — adventure — to all your favorite National Parks

By buying this tea, you are supporting the National Parks we all know and love

With your support, we can help keep these parks running smoothly and open for visitors

# TEA BOX PRODUCT DESIGN

In this project, I designed a tea box and logo.

**We are so glad you are here!**

Here at Second CRC, our vision is to build a spiritual family that demonstrates a love for God and a love for our neighbors locally and all over the world in a way that models the love of Jesus Christ. The ways we are working towards achieving our vision is through:

- In our church — through worship, discipleship, and ministries, provided for and by each person.
- In our community — through regular service projects for those with physical needs, regular fellowship events for those with relational needs, and regular invitations for those with spiritual needs.
- In our world — through the expanding support of missionaries and mission programs, and through the encouragement and support of our people to extend themselves in kingdom services.

## WEBSITE REDESIGN

I redesigned the website and logo for a local business. I used HTML and CSS to build the website.

## 3D MODELS AND UNITY AQUARIUM

In this project, I created a large number of 3D models using Maya and placed them within a navigable Unity environment that I designed.
